INSPIRED BY INNOVATION, WITHOUT COMPROMISE

Altura is the flagship premium marine seating brand, created to push helm seating beyond traditional design through elevated comfort, thoughtful engineering, modular construction, and refined styling.

What began as a reimagining of the classic teak ladderback, evolved into a complete lineup of high-end helm seating for premium boat builders seeking greater comfort, serviceability, flexibility, and customization.

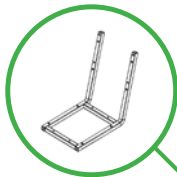

- ▶ A luxury seating brand focused on innovation, comfort, craftsmanship, and elevated onboard experience, receiving a 2025 IBEX Innovation Award.
- ▶ Integrated comfort technologies, including advanced suspension systems and available heating and cooling on select models.
- ▶ Distinct from the core TACO seating lineup, Altura represents the company's highest expression of luxury & innovation.
- ▶ A growing lineup of premium helm seating, extending the Altura design philosophy across multiple styles and configurations.

TEAK LADDERBACK HELM

REDEFINING THE FUTURE OF LADDERBACKS

- Uniquely supported ladderback with embedded stainless-steel framing.
- Electroplated stainless steel frame for added durability.
- Eliminates deflection while increasing durability, compared to structural teak designs currently in the market.
- Modular seat construction, designed for ease of service and increased warrantability.
- Mounts to any industry standard 5" x 12" slide plate assembly.

COMPARISON TABLE

	STRUCTURAL	BACKREST	COMFORT
ALTURA HELM	Full stainless steel structural frame assembly with no deflection.	Fully integrated backrest.	Internal seat suspension with added lumbar support.
COMPETITORS' LADDERBACKS	Critical mounting points reliant on teak strength.	Back cushion fastened with thin plastic snaps.	Foam-on-board construction, with stiff bottom and backrest.

FULL BOAT UPHOLSTERY

BOAT-IN-A-BOX CAPABILITIES

Our goal at TACO Seating is to partner with boat builders to create one-of-a-kind marine seating solutions. From helm chairs, pedestals and electric slides, to complete custom upholstery that includes coaming pads, cushions, hardware and more. We strive to bring your boat upholstery and hardware visions to life with an unmatched attention to detail.

- ▶ Full length bolsters, including options for transom and drive doors.
- ▶ Interior cabin upholstery.
- ▶ Material flexibility for interior and exterior applications.
- ▶ Tower panels.
- ▶ Multi-row helm seating.
- ▶ Bow, stern & console cushions.
- ▶ Custom OEM styling.

HIGHLIGHTS

ABOUT TACO SEATING

TACO Seating is devoted entirely to complete marine seating, upholstery, and hardware solutions for all types of boat builders. Our dedicated team of Engineers, Designers & Craftsmen, specialize in creating high-quality upholstery solutions and hardware packages for builders who seek visually stunning and contemporary onboard seating.

- ▶ TACO Seating operates within a 70,000-square-foot facility located in Largo, Florida, USA.
- ▶ We proudly celebrate 30-plus years of experience in marine seating and upholstery manufacturing.
- ▶ Specializing in fully engineered helm seating and premium full boat upholstery options.

PATRICK INDUSTRIES SYNERGY

- ▶ Access to a vast sourcing network.
- ▶ Efficient supply chain integration.
- ▶ Multi-brand collaboration within specialized Patrick branches.

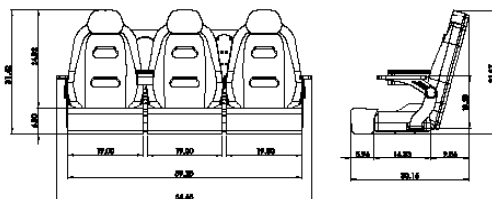

PROUD SUPPLIER PARTNERS

DESIGN & ENGINEERING

-

HIGHLY SKILLED TEAM

-
- A collage of four images showing different stages of shoe production. Top-left: A worker in a red jacket and blue protective mask is welding a metal frame. Top-right: A person wearing black gloves is cutting a large sheet of light blue material. Bottom-left: A person is working on a white, curved shoe component, possibly a sole or insole, using a tool. Bottom-right: A person is operating a sewing machine, stitching a piece of white fabric. The sewing machine has the brand name 'CONSEW' visible on its side.

SPECIALIZED CNC EQUIPMENT

-
- A large white sheet of material, possibly a protective film or a large-format print, is shown on a wooden workbench. The sheet features a complex, symmetrical cutout pattern in the center. The cutout consists of a large central void with several smaller rectangular and irregular shapes attached to its perimeter. The material is labeled with the number '46241-15' in three locations: once on the left side, once on the bottom left, and once on the bottom right. The number '46242-15' is also visible on the left side, near the top. The sheet is held in place by black clamps on the left and right edges. The workbench is made of light-colored wood, and various tools and materials are visible in the background.
